Hanoi University of Business and Technology

2018 - 2022

Information Technology

WORK EXPERIENCE

VTC Itemcom **8/2023 - 2/2026**

Frontend Developer

- Delivered 100+ responsive UI screens from Figma to production-ready code, ensuring compatibility across 95% of devices
- Built scalable and maintainable UI systems using CSS Grid, Flexbox, and modern responsive techniques
- Implemented smooth animations and interactions using modern frontend libraries
- Collaborated closely with cross-functional teams to deliver complex features on time
- Maintained high code quality via Git workflows, code reviews, and conflict resolution
- PROJECT EXPERIENCE
    - Developed landing pages & homepages for major game titles: AuPC, SRO, Phi Doi, Phuc Kich, Truy Kich, AuBeat
    - Contributed to large-scale platforms: VTC Homepage, Digital Traffic System, Online Testing Platform, Dien Bien Phu Newspaper, VGA Courses, Portal 1400
- Translated UI/UX designs into high-quality web applications using NextJS
- Integrated modern libraries such as Ant Design, TailwindCSS, and Swiper to enhance UI/UX

PROJECTS

Dien Bien Phu News Website -

Role: Frontend Developer

Description:
Developed a news website that allows users to browse the latest articles, save news for later reading, and interact through comments. The platform provides features such as news listing, detailed article pages, video content display, and tracking viewed articles.
Tech: Nextjs, TailwindCSS, Swiper, React Form, Axios
Project Link: https://willowy-capybara-4bb7d1.netlify.app/
Developed a responsive news platform that allows users to browse articles, watch embedded videos, and interact through a commenting system.
Converted Figma designs into pixel-perfect interfaces using **Next.js** and **TailwindCSS**, ensuring consistent UI/UX across devices.
Integrated RESTful APIs for news data, video content, and user authentication.
Built reusable React components (article cards, news lists, media sections, navigation) to improve maintainability and scalability.
Implemented responsive layouts and interactive sliders using **Swiper.js** to enhance user experience.

- Collaborated with designers and backend developers to ensure smooth API integration and timely delivery.

Cong 1400 Website -

Role: Frontend Developer

Description: Developed a platform that allows users to read news articles, register for charity campaigns, and create fundraising programs. The website provides information about ongoing charity activities and allows users to participate or support various campaigns.
Tech: Nextjs, TailwindCSS, Swiper, React Form, Axios
Project Link: https://harmonious-cobbler-5604d2.netlify.app/
Developed a charity campaign platform where users can read news updates, join fundraising programs, and register for charity activities.
Converted Figma designs into responsive interfaces using **Next.js** and **TailwindCSS**, ensuring consistent UI/UX across pages.
Implemented dynamic rendering for campaign listings and news articles, allowing users to easily explore campaign details.
Integrated RESTful APIs to display news, campaign data, and video content.
Built reusable React components such as campaign cards and news sections to improve scalability and maintainability.
Applied responsive design and used **Swiper.js** for interactive sliders to enhance user engagement.

- Collaborated with designers and backend developers to ensure smooth API integration and efficient development workflow.

SRO Game Portal Website -

Role: Frontend Developer

Description: Developed a gaming news website that provides information about the game, including news updates, download links, and in-game top-up services. The platform helps players stay updated with game events and easily access important game resources.
Tech: Next.js, TailwindCSS, Swiper
Project Link: https://glowing-youtiao-b3fa34.netlify.app/
Developed a **gaming portal website** that provides players with the latest game news, download links, and access to in-game top-up services. The platform serves as a central hub where users can stay updated with game events, announcements, and important resources.
Translated Figma designs into pixel-perfect, responsive interfaces using **Next.js** and **TailwindCSS**.
Implemented dynamic rendering for game news, announcements, and media content to improve information accessibility.
Integrated RESTful APIs for authentication, news retrieval, and video display.
Built reusable React components such as news cards, content sections, navigation, and media blocks for a scalable frontend architecture.
Applied responsive design and used **Swiper.js** to create interactive sliders for featured content.

- Collaborated with designers and backend developers to ensure accurate UI implementation and smooth API integration.
